Pfeiffer Vacuum Offers a New Vacuum Calculator

- **Find the right vacuum solution**
- **Identify matching products for specific applications**
- **Perform different calculations for self-configured pumping solutions**

Aslar, Germany, March 28, 2023. Pfeiffer Vacuum offers their customers a vacuum calculation tool to identify specific vacuum products for their application, examine evacuation as well as pump down curves and perform different calculations for self-configured pumping solutions.

“With our new vacuum calculator, we aim to make the lives of our customers easier. When looking for the right vacuum solution, the technical parameters can be inserted into the tool and the matching products are displayed. Moreover, customers can perform different calculations for existing pump solutions”, explains Daniela Kunzig, Head of Digital Business. This enables the customers to compare different vacuum solutions with each other.

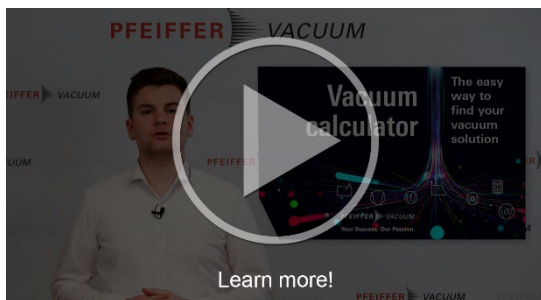

The **vacuum calculator** is available via the webportal **„Select & Request“**. A contact form is linked to each search or calculation via which the customers can directly contact the sales engineer in charge to request a quote.

About Pfeiffer Vacuum

Pfeiffer Vacuum (stock exchange symbol PFV, ISIN DE0006916604) is one of the world's leading providers of vacuum solutions. In addition to a full range of hybrid and magnetically levitated turbopumps, the product portfolio comprises backing pumps, leak detectors, measurement and analysis devices, components as well as vacuum chambers and systems. Ever since the invention of the turbopump by Pfeiffer Vacuum, the company has stood for innovative solutions and high-tech products in the analytical, industrial, research & development, semiconductor and future technologies markets. Founded in 1890, Pfeiffer Vacuum is active throughout the world today. The company employs a workforce of some 4,000 people and has more than 20 sales and service companies as well as 10 manufacturing sites worldwide.
