

Leak detectors by Pfeiffer Vacuum & Acquisition of Nor-Cal Products Inc.

Dear reader,

In this issue we will inform you about the following topics:

- Pfeiffer Vacuum leak detectors trace every leak
- Pfeiffer Vacuum acquired Nor-Cal Products for USD 68 million
- Breaking ground for new state-of-the-art building at the headquarters of Pfeiffer Vacuum subsidiary in North America
- Vacuum Technology exposes Doping Offenders
- Dates & Events

Your Pfeiffer Vacuum team

Vacuum solutions from a single source

Pfeiffer Vacuum leak detectors trace every leak

From miniature electronic units right up to large-volume vessels, from media escaping from vacuum systems to gases entering them – the uses for leak detectors are as broad as the range of industrial products. The extensive range of Pfeiffer Vacuum leak detectors provides the answer for all these requirements.

[Our leak detectors portfolio >>](#)

In addition, we also offer various technical trainings on the subject of leak detection.

Company

Pfeiffer Vacuum acquired Nor-Cal Products for USD 68 million

On June 22, 2017 Pfeiffer Vacuum announced the acquisition of US-based Nor-Cal Products Inc. ("Nor-Cal"). With around 300 employees in the USA and Vietnam, Nor-Cal manufactures premium-quality vacuum components, chambers and valves for international customers in the fields of semiconductors, coating and displays as well as for leading universities and research facilities.

Breaking ground for new state-of-the-art building at the headquarters of Pfeiffer Vacuum subsidiary in North America

Pfeiffer Vacuum, one of the world's leading providers of high-tech vacuum solutions for the semiconductor, industrial, coating, analytical and R&D markets, is breaking ground in Nashua, NH, USA, on a new, two story 27,000 square foot building. This modern construction will house the North American headquarters for administration, sales, product management, marketing and customer care. [To the press release](#)

Did you know?

Vacuum Technology exposes Doping Offenders

Faster, higher, further: The demands of competitive sport are growing relentlessly. Many athletes bow to the pressures of these expectations by turning to banned doping substances. Ever since the scandal involving Russian athletes who used prohibited substances in great numbers during the 2014 Winter Olympics in Sochi to enhance their performance, doping has moved well and truly to the forefront of public attention.
